Professional Summary

Results-driven Python Developer pursuing an MCA with a strong foundation in Software Engineering, Object-Oriented Programming (OOPs), Database Management Systems (DBMS), Operating Systems (OS), and Computer Networks (CN). Hands-on experience developing responsive web applications, optimizing relational database queries, and integrating machine learning pipelines. Analytical thinker and adaptable quick learner seeking to leverage software development skills in the HCLTech Graduate Trainee Program.

Core Skills

- **Programming Languages:** Python, Java, C++, SQL
- **Web Development:** Django, HTML5, CSS3, JavaScript (ES6+), Bootstrap, jQuery
- **Database Management:** SQL, MySQL, MS SQL Server, Relational Database Design
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Streamlit, Hugging Face Transformers, PyTorch
- **Tools & Platforms:** Git, GitHub, VS Code, Hugging Face Spaces
- **CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Software Engineering (SE), SDLC
- **Soft Skills:** Analytical Thinking, Problem Solving, Team Collaboration, Technical Communication

Education

MCA – Institute of Engineering and Technology, Lucknow CGPA: 8.43 (ongoing) First Class	2024–2026
BCA – IME Ghaziabad Percentage: 69.56% First Class	2020–2023
Class XII – S.B.V. Rouse Avenue (CBSE) Percentage: 72.33% First Class	2020
Class X – S.B.V. Anand Vihar (CBSE) Percentage: 65.17% First Class	2018

Projects

AI Twitter/X Sentiment Analyzer (Final Year Project) Live Demo — GitHub Repo	<i>Python, Flask, PyTorch, Hugging Face, JavaScript</i>
• Developed a full-stack web application utilizing Flask for the backend server and vanilla JavaScript for the client interface to evaluate live user statements and X timeline data. • Integrated a RoBERTa-based deep learning transformer model (cardiffnlp/twitter-roberta-base-sentiment-latest) via PyTorch to execute 3-class sentiment classification on over 124 million parameters. • Designed interactive data visualization charts summarizing metrics (Positive, Neutral, Negative percentages) and established Tweepy API connections for timeline queries with robust mock fallback routines.	
Social Media Content Analyzer Live Demo — GitHub Repo	<i>Python, Streamlit, Pandas, NumPy</i>
• Engineered a responsive web dashboard in Streamlit to aggregate, clean, and visualize content performance indicators and text files. • Utilized Pandas and NumPy data pipelines for structural cleaning, trend sorting, and sentiment scoring across CSV datasets.	

Online Bookstore Web App

Django, SQL, Bootstrap

- Built a full-stack e-commerce bookstore leveraging Django's Model-View-Template (MVT) architecture with secure session-based authentication.
- Designed database schemas in MySQL, writing optimized SQL queries to manage products, order carts, and relational transaction data.

Certifications

- Smart India Hackathon 2025 – Participant — [View Certificate](#)
- Data Analysis with Python – IBM SkillsBuild — [View Certificate](#)
- AI Agent Architect Certificate — [View Certificate](#)

Achievements

- Created and deployed multiple academic full-stack systems and data analytics dashboards using Python and Django.
- Actively solving algorithmic and logical problems on [LeetCode](#) to refine data structures and reasoning skills.
- Maintained an active GitHub profile tracking software engineering version-controlled progress.
